**DETAILED ACTION****Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b). Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 74-103 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent 5,599,186 and claims 1-76 of U.S. Patent 6,086,477. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the prior patents claim receiving an indication of a lottery entry wherein the lottery entry being active in at least a first lottery drawing; receiving an indication that the lottery entry is to be active in at least a second lottery drawing if the lottery entry fails to qualify for a prize in the first lottery drawing, the second lottery drawing being subsequent to the first lottery drawing; determining a result of the first lottery drawing with respect to the lottery entry and activating the lottery entry in the second lottery drawing if it is determined that the lottery entry has failed to qualify for a prize in the first

lottery drawing. Thus, the claimed invention would have been obvious to an artisan at the time of the invention in view of claims 1-30 of U.S. Patent 5,599,186 and claims 1-76 of U.S. Patent 6,086,477.
